

Three environments to choose from.
Since SY-TOS is included,
you can use it the same day you buy it.

TURBOTAPE

Features a large 160MB capacity, a space-saving, internal 3.5" form-factor streamer, and compatibility with the 5 1/4" form-factor.

■High-speed transfer of data

Data transfer of up to 7 MB/minute (112.5 KB/second) is guaranteed by the 90 ips tape speed and 12,800 bpi recording density. As much as 160 MB of data can be transferred in about 23 minutes.

■Space-saving, internal 3.5" form-factor, compatible with the 5 1/4" form-factor

The drive has the same bezel size as a standard 3.5" floppy disk drive. With the adapter that is attached for the 5 1/4" form-factor, the MACH 7 can handle both the 3.5" form-factor and the 5 1/4" form-factor.

With a built-in power supply, this stand-alone 160 MB model is complete.

■Compact and simple design

The power supply is built-in.

The design is simple, the components are skillfully integrated so connections are easy and space is conserved.

■High-speed transfer

Data transfer of up to 7 MB/minute is guaranteed by the 90 ips tape speed and 12,800 bpi recording density.

As much as 160MB of data can be transferred in about 23 minutes.

■Automatic voltage switching from 85 V to 264 V

The MACH 7x can handle voltages from 85 V to 264 V and frequencies from 45 Hz to 67 Hz. The required power source is not fixed, but is variable with this universal model.

High-speed transfer of 60MB in only 12 minutes Internal 5 1/4" form-factor

■Room for 60 MB of data

The 60 MB data storage is useful for tasks other than hard disk backup.

This capacity is useful for specific tasks like file management and loading programs to and from the computer.

But, there is more. The 90 ips tape speed coupled with the efficient, high recording density of 8,000 bpi makes the fast 5 MB/minute (86.3 Kbytes/second) transfer speed possible. An impressive 60 MB of data can be transferred in only 12 minutes.

■A slim 41 mm

For reliable tape loading in a lightweight, compact unit, the slide lock is incorporated.

SPECIFICATIONS

	MACH-7	MACH-7x	MACH-5
Drive	MT-2ST/N55	SB-3000D	MT-2ST/45D
Formatted Capacity	164.0Mbytes	164.0Mbytes	61.4Mbytes
Data Transfer Rate	7Mbytes/min.	7Mbytes/min.	5Mbytes/min.

Sytos Plus Driver Names
for the Teac Magnetic Tape Drives

Subj : Sytos Plus Drivers

Turbo Tape Mach 5 - 60 megabytes

-> Driver Name - ISA - TEAC MT2ST 45D AT
 MCA - TEAC MT2ST 45D MC
-> Interface Adapter - Teac DC-1 (ISA)
 Teac DC-2 (MCA)
-> Data Cassette - Read/Write Teac CT600H
 Maxell CS600HD

Turbo Tape Mach 7, 7X & 7X PS2 - 160 megabytes

-> Driver Name - ISA - TEAC MT2ST N55 AT
 MCA - TEAC MT2ST N55 MC
-> Interface Adapter - Teac DC-1 (ISA)
 Teac DC-2 (MCA)
-> Data Cassete - Write/Read Teac CT600N
 Maxell CS600XD
 - Read Only Teac CT600H
 Maxell CS600HD

Turbo Tape Mach 14, 14X & 14X PS2 - 600 megabytes

-> Driver Name - ISA - TEAC MT2ST F50 PMT
 MCA - TEAC MT2ST F50 PMT
-> Interface Adapter - Teac DC-3 (MCA)
 Teac DC-4 (MCA)
-> Data Cassette - Write/Read Teac CT600F
 Maxell CS600SX
 Read Only Teac CT600N , CT600H
 Maxell CS600XD, CS600HD

Other drivers provided in the Teac OEM version of Sytos Plus.

-> TEAC MT2ST N50 PMT - 160 meg SCSI for the PROCOM Adapter
 CT600N data cassette.
TEAC MT2ST F50B PMT - 600 meg SCSI (big buffer) for the
 PROCOM Adapter - CT600F.
TEAC MT01N PMT - 155 meg SCSI for the PROCOM Adapter
 DC2155 data cartridge.
TEAC MT2ST N50 AHA - 160 meg SCSI for the ADAPTEC Adapter
 CT600N data cassette.
TEAC MT2ST F50 AHA - 600 meg SCSI for the ADAPTEC Adapter
 CT600F data cassette.
TEAC MT2ST F50B AHA - 600 meg SSCSI (big buffer) for the
 ADAPTEC Adapter - CT600F.
TEAC MT01N AHA - 155 meg SCSI for the ADAPTEC Adapter
 DC2155 data cartridge.

Other files provided.

-> PS2 configuration file for the Teac DC-2: @518A.ADF
PS2 configuration file for the Teac DC-4: @7F01.ADF

Sytos Plus Driver Names
for the Teac Magnetic Tape Drives

Interface adapters - definition

-> Teac DC-1 = Teac 8 bit DC-1 - ISA
Teac DC-2 = Teac DC-2 - MCA
Teac DC-3 = Procom 8 bit CCE - ISA
Teac DC-4 = Procom MCE - MCA

The drivers for the Teac DC-1 will work correctly at DMA #1, 2 and 3, any of the Interrupt channels (IRQ) and Base address between the range of 000h to 3FCh. These parameters are set by entering the "UTILITIES" menu then the "BACKUP DEVICE SETUP" submenu then either by adding a device or by editing a device.

Drivers for both the Procom and the Adaptec SCSI interface adapters perform an auto configuration. The Procom CCE will display configuration parameters in the "BACKUP DEVICE SETUP" menu that are unchangeable. The Adaptec adapters normally will not display any configuration parameters in the "BACKUP DEVICE SETUP" menu.
